

The Spaghetti Giraffe

1. Colour in the giraffe before cutting out the different pieces.
2. Punch holes through the grey circles - this is for the pins to be pushed through. If you don't have a hole punch this size use something sharp like a nail to make the holes.
3. Thread the split pin through the top leg, then the body and finally the bottom leg.
4. Turn the cut-out over and press the pin open
5. Twist slightly so the pin can't be seen from the front.
